Shiv Shakti Pathology Lab

Shiv Shakti Pathology Laboratory

Dr. P.K. BAGHEL
M.B.B.S., D.C.P.

Equiped with:
- Teco - 168 Auto Analyser
- Cell Counter Sysmex- X1 Japan
- Easylyte Na+/K+ Analyser Japan
- Elisa Plate Reader
- Micro Plate Washer Itly

Date	: 10/10/2026	Lab. Ref. No.	: 2
Patient's Name	: Mr. KHUSHI SAXENA	Age / Sex	: 35 Yrs. / Male
Referred by	: Dr. P.K. Baghel	Sample by	: Amit Kumar

CODE: 0046 **CBC + ESR**

TEST NAME	RESULTS	UNITS	NORMAL RANGE
HB - (Haemoglobin)	12	g/dL	11.5 - 15.5
Red Blood Count (RBC Count)	**5**	10^6/µL	3.8 - 4.8
Packed Cell Volume (PCV)-Hematocrit	**65**	%	30 - 55
Mean Corpuscular Volume (MCV)	**14**	fL	80 - 96
Mean Corpuscular Hemoglobin (MCH)	**2**	pg/cell	28 - 33
Mean Corpuscular Hb concentration (MCHC)	32	g/dL	31 - 36

Amit Kumar

Dr. P.K. Baghel
MBBS,MD

All investigations have their limitation which are imposed by the limits of sensitivity and specificity of individual assay procedures as well as the specimen received by the laboratory. Isolated laboratory investigations never confirm the final diagnosis of the disease. the only help in arriving at a diagnosis in conjunction with clinical presentation and other related investigations.

FINAL OVERALL REPORT SUMMARY

Abnormal Findings Across All Pathology Tests

TOTAL ANALYZED	HIGH	LOW
6	2	2

▲ HIGH HIGH PARAMETERS (2)

TEST	PARAMETER	RESULT	REFERENCE RANGE
[0046]	Red Blood Count (RBC Count)	5 10^6/µL	3.8 - 4.8 10^6/µL
[0046]	Packed Cell Volume (PCV)-Hematocrit	65 %	30 - 55 %

▼ LOW LOW PARAMETERS (2)

TEST	PARAMETER	RESULT	REFERENCE RANGE
[0046]	Mean Corpuscular Volume (MCV)	14 fL	80 - 96 fL
[0046]	Mean Corpuscular Hemoglobin (MCH)	2 pg/cell	28 - 33 pg/cell

CLINICAL IMPRESSIONS & ABNORMAL PANEL FINDINGS

⚠ CLINICAL CONCLUSION & IMPRESSION [0046] CBC + ESR — 4 Parameter(s) Deviated

PRIMARY IMPRESSION: Microcytic Hypochromic Anemia pattern (suspect Iron Deficiency or Thalassemia trait)

CBC with Erythrocyte Sedimentation Rate (ESR) combines comprehensive cellular blood counts with an acute-phase inflammatory marker. ESR reflects non-specific systemic inflammation, infection, autoimmune activity, or tissue injury.

CLINICAL SIGNIFICANCE & POTENTIAL CAUSES:

- ▲ High **RBC, Hb, or PCV:** Dehydration, polycythemia vera, chronic hypoxia, heavy smoking
- ▼ Low **MCV:** Microcytic hypochromic anemia, thalassemia trait, lead poisoning
- ▲ High **WBC & Neutrophils:** Acute bacterial infections, systemic inflammation, tissue necrosis, physical stress
